

SL Fill Q3

Mould remediation filler, fine

Constituents

VOC content
does not contain

Biocidal agents
does not contain

SVHC as per Regulation 1907/2006/EC ("REACH")
Does not contain (<0.1%)

Heavy metals pursuant to VdL Guideline 01
Not contained as constitutive ingredients

Legal requirements

Construction Products Regulation
CE marking in accordance with EN 998-1: 2017-02

GISCODE

ZP1

Eco-labels, certificates, declarations

Guideline VdL 01
Free of aromatic compounds
Solvent-free
Plasticiser-free
Biocide-free / preservative-free

Building certificates

Suitability as per DGNB Criterion ENV 1.2 - "Local environmental impact"

Nr.	Place of use	Product type	QS1	QS2	QS3	QS4
2	Coatings on predominantly mineral substrates in interiors, such as filler (and dispersion filler) as well as wallpaper, non-woven fabric, gypsum plasterboard, etc. Not intended for floors with special durability requirements (e.g. OS systems) and traffic routes such as underground car parks, access roads	This means decorative paints, primers, decorative fillers (including Q filler) and deep primer, floor coatings without special resistance requirements, concrete glazes	Yes	Yes	Yes	Yes

Suitability as per BNB Criterion

No.	Construction product group	Construction product type	QN1	QN2	QN3	QN4	QN5
4	Filling compounds (including Q filling), dust-binding coatings/primers (in accordance with Decopaint Directive, Cat. G + H), protective coatings for concrete (resistant to oil, acid, water, etc.)	Coatings on predominantly mineral interior surfaces: Concrete, brickwork, mortar, filler (including dispersion filler), plaster, non-woven fabric, gypsum plasterboard, etc.	Yes	Yes	Yes	Yes	Yes

[nachhaltigkeit_qng_kriterium]

[LANG_POS]	Construction product group	Construction product type	QNG
5.3	Filling compounds (including Q filling), dust-binding coatings/primers	Coatings on predominantly mineral interior surfaces: Concrete, brickwork, mortar, filler (including dispersion filler), plaster, gypsum plasterboard, etc.	Yes

[nh_zusaetzliche_info]

As a member of Deutsche Bauchemie e.V., Remmers GmbH is authorised to determine the conformity of products with the European model EPD with the help of an internal FEICA guideline. The product is compliant with the European model EPD for modified mineral mortars, group 1 (EPD-DBC-20220217-IBF1-EN). This means that the LCA data and the other content of this model EPD apply to the product and can be used for the assessment of buildings.
