Sustainability Data Sheet
Product number 3005

VZ MB

Liquid retarder

Constituents

VOC content (definition according to Directive 2004/42/EC)

does not contain

Biocidal agents

Contains in-can preservatives based on the biocidal active ingredients BIT (< 50 ppm) and MIT (< 50 ppm) to protect the contents of the container from microbial contamination.

SVHC as per Regulation 1907/2006/EC ("REACH")

Does not contain (<0.1%)

Guideline VdL 01 (as of June 2024, 9th revision)

Free of aromatic compounds
Solvent-free
Plasticiser-free

Building certificates

Note on suitability IAW DGNB criterion ENV 1.2 – 'Risks to local environment' / version 2023
Please note that, to the best of our knowledge, the product cannot be classified in any building material category of the DGNB building certification system because the intended use described here is not covered by that system. This does not contradict the use of the product, nor does it influence the assessment of the construction project to be certified according to these criteria.

Note on suitability according to BNB criterion / Version V 2015 (version dated 28/09/2017)
Please note that, to the best of our knowledge, the product cannot be classified in any building material category of the BNB building certification system because the intended use described here is not covered by that system. This does not contradict the use of the product, nor does it influence the assessment of the construction project to be certified according to these criteria.

Note on suitability according to QNG criterion / Version 1.3 2022
Please note that, to the best of our knowledge, the product cannot be classified in any building material category of the QNG building certification system because the intended use described here is not covered by that system. This does not contradict the use of the product, nor does it influence the assessment of the construction project to be certified according to these criteria.
